SUMMARY

Junior Software Developer with a strong foundation in front-end development using React, JavaScript (ES6+), and TypeScript (basic familiarity). Experienced in building responsive, accessible web applications, integrating REST APIs, and deploying applications using modern workflows. Skilled in debugging, writing unit tests, and delivering maintainable features within Agile teams. Passionate about learning best practices, collaborating through Git workflows, and contributing to reliable, scalable software delivery.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript (basic), React.js, HTML5, CSS3

Front-End Development: Responsive Design, Component-Based Architecture, Styled Components

APIs & Data: REST APIs, JSON, Asynchronous Programming, API Integration

Testing: Jest, React Testing Library, Unit Testing

Tools & Workflow: Git, GitHub, Git Branching Workflows, Vercel Deployment, VS Code, Chrome DevTools

Software Practices: Debugging, Root Cause Analysis, Code Reviews, Performance Optimization, Agile (Scrum)

UI/UX: Figma, Accessibility (WCAG), Wireframing, Prototyping

PROFESSIONAL EXPERIENCE

UX Analyst and Website Manager | PHD Consulting, Moncton, NB

March 2021 – July 2022

- Collaborated within a cross-functional Agile team to deliver scalable LMS platform features and UI enhancements.
- Investigated and resolved production issues using structured debugging and root cause analysis, improving reliability and user experience.
- Participated in feature testing and validation workflows to ensure quality before release.
- Optimized front-end performance and API-driven content delivery, improving load times and increasing session duration by 150%.
- Translated business and user requirements into maintainable technical solutions while ensuring WCAG accessibility compliance.
- Documented feature behavior and troubleshooting steps to support team collaboration and ongoing maintenance.

Freelance Front-End Developer & Independent Study | Self-Employed, Calgary, AB

October 2024 – Present

- Completed the Meta Front-End Developer Certificate (Coursera, March 2026), covering React, Advanced React, HTML & CSS in Depth, and UX/UI principles.
- Developed a full-featured React weather application integrating external REST APIs, custom hooks, and unit testing — deployed live on Vercel.
- Built and designed a personal portfolio website from scratch, applying modern CSS, responsive layouts, and a JSON data layer for maintainability.
- Continued deepening skills in TypeScript, accessibility standards, and component architecture through self-directed learning.

Sales Associate | Best Buy Canada, Moncton, NB

August 2022 – October 2024

- Troubleshoot technical issues and explained solutions clearly to customers, strengthening communication and problem-solving skills.
- Worked in a fast-paced environment requiring adaptability, collaboration, and attention to detail.
- Built strong customer relationships while resolving technical concerns efficiently.

TECHNICAL PROJECTS

Weather App (Active Development)

[GitHub](#) / [Live](#)

- Built a responsive React application integrating external REST APIs to display real-time weather data.
- Implemented reusable components and structured state management using React hooks (useState, useEffect).
- Developed features using Git branching workflows, including building a hero image feature in a separate development branch before merging.
- Handled asynchronous operations, loading states, and error handling to improve reliability.
- Debugged rendering and API issues using Chrome DevTools and logging techniques.
- Deployed application using Vercel, supporting iterative development and release workflows.

Little Lemon Restaurant

[GitHub](#) / [Live](#)

- Developed a responsive React single-page application using routing, form validation, and reusable components.
- Implemented unit tests using Jest and React Testing Library to ensure feature reliability.
- Used Git for version control and iterative development of UI components.
- Debugged UI and state management issues to improve performance and usability.

PHD Academy LMS Improvements

[Live](#)

- Improved LMS web platform by identifying and fixing UI bugs and performance bottlenecks.
- Reduced load times and increased average session duration by 150% through performance optimization.
- Provided post-deployment support and troubleshooting to maintain system reliability.

EDUCATION

Meta Front-End Developer Certificate

Coursera / Meta | March 2026

Relevant Coursework: React, Advanced React, HTML & CSS in Depth, UX/UI Principles

Graduate Diploma — Mobile Application Development

Cambrian College, Sudbury, ON | February 2022 | GPA: 3.5

Relevant Coursework: Web Development, Database Management, Cloud Computing

Bachelor of Science — Electrical Engineering

University of Debrecen, Hungary | January 2019 | GPA: 3.7

Relevant Coursework: Programming I & II, Informatics, Automation Systems
